Client Information

- Kyle Armstrong (kyle@thetyros.com)
- Owner of Zooom App - an app that helps referees get game footage so they can practice calls
- Owner of RefReps - this is the company we are working with. Tasked with creating a game that will train referees to make calls

What we changed because of our mentor

- Add indicator for a lesson that has been edited, but not published.
- Add another publish button for publishing.
- Use enums for calls rather than its name as a string.

What we changed or will change because of our client

- We are going to add the upload button where the add video section is
- We are going to make the calls from a list of pictures

Third Iteration Features

- Users can download videos to Game Application
- Users can download “lessons” to Game Application
- Admin can delete lesson pack and lesson pairs and the changes will be made to the database
- Admin can upload videos from the "Add video" section
- Admin can pick calls from selectable thumbnails
